Academic Acceleration

The board recognizes the need for eight grade students to have greater access to rigorous advanced courses. To that end, the district may enroll students who meet or exceed the state standard on the eighth grade English language arts or mathematics statewide student assessment in the next most rigorous level of advanced courses or program.

The subject matter of courses or program in which students may be enrolled will be determined by the areas of the statewide assessment in which the student met state standards. Students who meet or exceed state standard on the English language arts statewide student assessment are eligible for enrollment in English, social studies, humanities, and other related subjects. Students who meet or exceed the state standard on the mathematics statewide student assessment may be eligible for enrollment in advanced mathematics courses.

Beginning in 2021-2022 school year, students who meet or exceed the state standard on the Washington comprehensive assessment of science may be eligible for enrollment in advanced courses in science.

The district will notify students and parents/guardians regarding the academic acceleration policy and the advanced courses available to students. The district will provide the parent/guardian with an opportunity for the student to opt out of participation in the academic acceleration process and enroll in an alternative course or program that aligns with the student's high school and beyond plan goals.
