Student Immunization And Life-Threatening Health Conditions

Immunizations
In order to safeguard the school community from the spread of certain communicable diseases and in recognition that prevention is a means of combating the spread of disease, the board requires a student to present evidence of his/her having been immunized against diseases as required by the State Board of Health.

Exemptions from Immunization
The district will allow for exemptions from immunization requirements only as allowed for by RCW 28A.210.090.

Meningococcal Immunizations Information Distribution
The district will provide parents and guardians of students in sixth grade and above with information about meningococcal disease at the beginning of every school year. The information will address the characteristics of the disease; where to find additional information about the disease; vaccinations for children; and current recommendations from the United States Centers for Disease Control and Prevention regarding receiving the vaccine.

Human Papillomavirus Disease Information
At the beginning of every school year, the district will provide to parents and guardians of sixth through twelfth grade students, information provided by the Washington State Department of Health about human papilloma virus (HPV) disease and its vaccine.

The information will include the causes and symptoms of human papillomavirus, how the disease is spread, the places where parents and guardians may obtain additional information and vaccinations for their children and current recommendations from the United States Centers for Disease Control Prevention regarding the vaccine.

Life-Threatening Health Conditions
Prior to attendance at school, each child with a life-threatening health condition will present a medication or treatment order from a Licensed Healthcare Provider (LHP) addressing the condition. A life-threatening health condition means a condition that will put the child in danger of death during the school day if a medication or treatment order providing authority to a registered nurse and nursing plan are not in place. Following submission of the medication or treatment order, a nursing plan will be developed.

Students who have a life-threatening health condition and no medication or treatment order presented to the school will be excluded from school, to the extent that the district can do so consistent with federal requirements for students with disabilities under the Individuals with Disabilities Education Act (IDEA) and Section 504 of the Rehabilitation Act of 1973, and according to the due process requirements in School District Procedure 3413PExclusion from School

The district will exclude students only as allowed for by RCW 28A.210.120 and WAC 392-380-050.

The superintendent will adopt procedures necessary to implement this policy.
